SUMMARY

AI/ML Engineer with a background in Control and Automation Engineering. Builds LLM applications, retrieval pipelines, and tool-enabled agents, with hands-on experience in model fine-tuning, knowledge graphs, and backend development.

Core Focus Areas:

- Architecting robust RAG pipelines and LLM orchestration frameworks.
- Training and optimizing ML models (XGBoost, Neural Networks) for predictive analytics.
- Engineering data ingestion pipelines to transform raw hardware/sensor metrics into actionable AI features.
- Developing high-load, production-ready backends using Python, FastAPI, and Docker.

PROFESSIONAL EXPERIENCE

ENKO, *AI/ML Engineering Intern* 03/2026 – 06/2026
- Built telemetry ingestion and preprocessing pipelines for predictive maintenance ML workflows. Beykoz, Istanbul
- Processed PLC and sensor data across Modbus/MQTT systems.

ADATECH, *AI Engineering Intern* 06/2025 – 09/2025
- Built and deployed an AI-powered people analytics dashboard. Guzelyalı, Istanbul
- Developed an XGBoost employee-turnover model achieving 91.7% accuracy.

Kosmos, *IT & Systems Intern* 06/2021 – 09/2021
- Supported system configuration, software deployment and troubleshooting. Harbiye, Istanbul

EDUCATION

Control and Automation Engineering (GPA: 3.01/4.00), *Yıldız Technical University* 2020 – 2026

Fener Rum High School 2016 – 2020

PROJECTS

LifeOS, *Agentic AI & Knowledge System*
- Built a Neo4j-based knowledge system combining graph relationships with semantic retrieval.
- Developed ingestion pipelines and tool-enabled agents for persistent knowledge management and multi-step tasks.

FtsDoc, *Document Intelligence*
- Fine-tuned a transformer model for entity and structured information extraction from CVs, contracts, invoices, and technical documents.
- Built a LangChain pipeline for document ingestion, classification, and structured output generation.

Neural-Adaptive Control & State Estimation, *Graduation Thesis*
- Combined neural-network adaptation, Extended Kalman Filtering, and fuzzy control for a nonlinear system under uncertainty.

Matchfluence, *B2B SaaS Marketplace*
- Built backend infrastructure for an influencer marketing platform using Supabase.
- Designed an embedding-based semantic matching.

SKILLS

LLM Applications: RAG, Fine-Tuning, Embeddings, Tool Use, Multi-Agent Workflows | **Machine Learning:** PyTorch, Scikit-learn, XGBoost, Hugging Face Transformers | **Frameworks & Protocols:** LangChain, LangGraph, LlamaIndex, MCP | **Retrieval & Data:** Neo4j, Qdrant, ChromaDB, Pinecone, Vector Search | **Backend & MLOps:** FastAPI, REST APIs, Docker, Git, CI/CD, Kubernetes, AWS | **Programming:** Python, TypeScript, C/C++, MATLAB

LANGUAGES

English: C1 | **Turkish:** Native | **Arabic:** A2 | **Greek:** Native

CERTIFICATES

Claude Academy: Model Context Protocol: Advanced topics: Anthropic | **AWS Certified Data Engineer - Associate:** Amazon Web Services | **Retrieval-Augmented Generation for Enhanced AI Outputs:** IBM | **MATLAB Deep Learning Training:** Mathworks
